

# 4.3.4

Release Notes

# Overview

## About the Release Notes

The Release Notes are a comprehensive user guide for the latest release of Mambu. The Mambu Release Notes give you everything you need to get up and running with the new features and enhancements in the latest release.

## What's Included in the Release Notes

For every new major enhancement, the Release Notes provide:

- A high-level description of the functionality
- Implementation tips to help you get started with setup and administration
- Best practices to help you maximize the benefits

Beyond the major new features, the Additional Enhancements section include a list and brief description of every other enhancement or functional change included in the latest release—everything from email, to new report types, to security and packaging.

## Your Feedback Matters

We know how important the Release Notes, online help, and documentation are to your company's success with Mambu. To continuously improve the service we deliver to you, we want to know what works and what doesn't. Let us know by contacting [support@mambu.com](mailto:support@mambu.com).

# 1. Bug fixes

## 1.1 Concurrent loan group disbursements lead to individual accounts with double disbursement transaction

In some situations, when two or more users tried to concurrently disburse a Solidarity Loan , the individual Loan Accounts from under that Loan Group got disbursed multiple times.

The problem was fixed and now, when concurrent disbursements are made, only the first disburse action will be triggered, while the other users will get an explicit error messages.

# 2. Improvements

## 2.1 Log Loan Funded and Loan Repaid accounting via GL Account defined in transaction channel

When a user made a disbursement or entered a repayment for a Loan Account with funding source, via a Transaction Channel with different GL account than the one on the Loan Product, the accounting for Loan Funded and Loan Repaid transactions were logged in the GL accounts defined in the Product.

However, it would make sense for the organizations to keep the accounting for investors in separate GL Accounts.

With this patch Mambu started logging Loan Funded and Loan Repaid accounting in the GL Account defined at Transaction Channel level, instead of GL Accounts defined in the corresponding Funding Loan Product.
